INTRODUCTION

I have spent much of my career life in the service industry and have more recently branched out into the technical world. As a creative person I am excited to be growing into a field that allows me to continually learn and build on my abilities. I am continually surprised how much my service industry experience plays into the development world. Paying attention to best practices to ensure customer satisfaction and learning how users will be navigating the site have proven to be good uses of my customer service skills.

MAKE DIGITAL GROUP

WEB DEVELOPER

JULY 2019 - CURRENT

I work on a small development team on a variety of websites. We work with different CMS's that provide our customers ways to control their own content while keeping strict deadlines and meeting high quality of standards to ensure our clients happiness and loyalty. Most of my responsibilities involve taking designs from our team and turning them into responsive websites.

TRILOGY EDUCATION

TEACHER ASSISTANT (FULL STACK WEB DEVELOPMENT PROGRAM)

MAY 2019 - CURRENT

As a Teacher's Assistant I help students before, during, and after class with any concepts they might be struggling with. I also assist the teacher by grading assignments, taking roll, and updating the class repo so students have access to all class materials.

PRIME EDITS

SENIOR PHOTO EDITOR/ CUSTOMER SATISFACTION

JULY 2016 - JULY 2018

I edited professional photographers work using the Adobe suite maintaining hundreds of clients and their individual needs. Keeping in contact with the clients and what they wanted from the editors was a large part of the job.

APPLE INC.

SALES / TECHNICIAN

NOVEMBER 2015-JULY 2016

When I wasn't helping customers find the right device to suit their needs, I was solving software issues as a part of the Genius team. Problem solving so many devices everyday, while staying within company guidelines, was very rewarding.

SETH EUGENE PHOTOGRAPHY

OWNER

I also run my own side photography business. I mainly focus on family portraits but also do some commercial work and weddings when the opportunities arise. Check out setheugenephoto.com to see some of my work.
